CV

Build a single-page personal CV/résumé as a static HTML + CSS website — no JavaScript, no framework, just semantic HTML5 and hand-written CSS. This is where you prove you actually know the raw building blocks before anything is allowed to hide them from you.

About Me

I am a Computer Science student at COMSATS University Islamabad (Lahore Campus), building a career in AI automation. My work combines a Computer Science foundation with hands-on automation projects: AI-powered workflows on Make.com, a Retrieval-Augmented Generation (RAG) chatbot on n8n, and rule-based AI systems built during my coursework.

I currently serve as Event Director for Microsoft Learn Student Ambassadors (MLSA) at my university, and I

Projects

RAG Pipeline & Chatbot

n8n, Pinecone, Google Gemini | Individual | 2026

- Built a Retrieval-Augmented Generation pipeline that ingests documents from Google Drive, chunks and embeds text using Google Gemini, and stores vector embeddings in Pinecone.
- Designed a chat-based AI Agent that retrieves relevant context from the vector store to answer user questions grounded in ingested documents, with conversational memory.

AI Email Triage & Draft Reply System

About MeEducationSkillsProjectsCertificationsContact

AI Lead Capture and Reply System

Make.com, Tally, Google Sheets | Individual | 2026

- Built a webhook-triggered automation that captures leads from a form, validates and logs them to Google Sheets, and uses AI to generate a personalized reply routed to the business owner.

Other Academic Projects

- **PrepPilot AI** - AI-powered academic decision assistant built with Google Gemini (AI Studio)
- **StressSense AI** - rule-based expert system with a 60+ rule knowledge base and an explainable-AI module (Python, Streamlit)
- **University Sports Management System** - full-stack database-driven web app with a real-time analytics dashboard (Python, SQL Server)
